

# Little Sewickley Creek Watershed Association BioBlitz

**Sunday, April 26 – Walker Park – Shelter 4**  
**All Ages – Free – No Registration Required**

**All Day:**

- Look for Creek Critters in the beautiful Little Sewickley Creek as it flows through Walker Park. Dip nets and cups will be available to borrow.
- View the spring wildflowers that are in bloom.
- Use the iNaturalist app to identify the organisms that you find. They will be added to our Watershed Project. (If you don't have the app, it would be helpful to download it before arriving.)

9:00	<b>Birding</b> Join Cindy, a local birder, to help identify the birds.
10:00	<b>Beaver Habitat Walk</b> Judy will guide you on a short drive to the trailhead. You can take a shorter or longer walk depending on how much you want to see of the beavers' habitat. Steve will also share his video at the shelter 10:00-1:00.
10:30	<b>Mushroom Walk</b> Cherie, an identifier with the PA Mushroom Club, will be looking for spring mushrooms.
12:00	<b>Plants, Creek Critters, and Lunch</b> Bring a picnic lunch to refuel! When you are done eating, join others looking for plants on land and critters in the creek. If you have boots, bring them since the water might be chilly. Or you can wear water sandals.
1:00 and 2:00	<b>Fish Walks</b> Dr. Brady Porter will be teaching people how to find and identify fish. BRING CHEST or HIP WADERS if you have them and WOULD LIKE TO PARTICIPATE IN ELECTROFISHING or you can stay on the shore. This will take place in Morrow-Pontefract Park, closer to the river.

**Bring water, bug spray, sunscreen and curiosity!**
